SUMMARY:

PhD candidate in Computational Neuroscience at the National University of Singapore developing biologically plausible models of associative memory and spatial navigation. My research integrates computational modeling, machine learning, and neuroimaging to investigate learning, memory, and decision-making across biological and artificial systems.

EDUCATION:

National University of Singapore

Ph.D. candidate in Medicine

Neuroscience Track and Biostatistics, Bioinformatics & Epidemiology Track

Singapore

Aug. 2023 – Present

Zhejiang University (Joint Degree Programme)

B.S. in Bioinformatics

Hangzhou, China

Sep. 2019 – Jun. 2023

The University of Edinburgh

B.S. (Hons) in Biomedical Informatics

Edinburgh, UK

Sep. 2019 – May. 2023

EXPERIENCE:

The N.1 Institute for Health, National University of Singapore

Graduate Researcher

Advisors: Andrew Tan, Camilo Libedinsky, Shih-Cheng Yen

Singapore

Sep. 2023 – Present

- Developed biologically plausible reinforcement learning models based on the spike response model, enabling successful learning of multiple paired-association navigation tasks.
- Developed a representation learning model incorporating Hebbian plasticity and neurogenesis that reproduces experimentally observed pattern separation effects not captured by canonical reinforcement learning models.

Centre for Discovery Brain Sciences, The University of Edinburgh

Research Intern; Advisor: Gediminas Lukšys

Edinburgh, UK

Mar. 2022 – Aug. 2023

- Compared emotion and memory decoding performance across real fMRI datasets and a meta-analysis database using multiple machine learning models, providing evidence for systematic biases associated with commonly used statistical correction procedures in neuroimaging.
- Estimated parameters of biologically inspired reinforcement learning models incorporating place, distance, and border cells, identifying computational correlates underlying temperature-based behavioral differences.

School of Brain Science and Brain Medicine, Zhejiang University

Research Intern; Advisor: Zhiping Wang

Hangzhou, China

Jan. 2022 – Sep. 2022

Jun. 2020 – Aug. 2020

- Analyzed label-free quantification proteomics datasets and conducted downstream enrichment analyses.

- Developed a web-based fMRI data visualization platform featuring automated anatomical labeling function to facilitate data exploration and interpretation.

Unsupervised Hebbian learning drives biologically interpretable pattern separation in a hippocampal-striatal network. Spotlight talk and poster presentations, **AAAI Workshop** on Neuro for AI & AI for Neuro, Singapore, January 2026. doi: 10.48448/jsed-nf31.
- **Wang, J.**, Shetru, V. J., Kumar, M. G., Libedinsky, C., Yen, S.-C., Tan, A. Y.-Y. and Polepalli, J. S. A biologically plausible computational model of hippocampal neurogenesis and pattern separation in memory. Poster presentation with short paper, 8th Annual Conference on **Cognitive Computational Neuroscience (CCN)**, Amsterdam, Netherlands, August 2025.
- Wang, S., **Wang, J.**, Zhu, W., Cheng, Y., Aydemir, B., Qiu, Y., Gerstner, W., Sandi, C. and Luksys, G. Computational model-based analysis of spatial navigation strategies under stress and uncertainty using place, distance and border cells. Poster presentation, **Society for Neuroscience (SfN)** Meeting, Washington, D.C., November 2023.

GRANTS & AWARDS:

NUS Research Scholarship
NUS Graduate School

2023 – 2028

Outstanding Graduate of Zhejiang University*Zhejiang University*

2023

Zhejiang University Scholarship*Zhejiang University*

2022

Academic Scholarship (¥40,000)*ZJU-UoE Institute*

2022

Student Research Training Program Funding (¥1,200)*Zhejiang University*

2021 – 2022

TEACHING:**National University of Singapore***Graduate Teaching Assistant*

- Systems Neurobiology
- Beginning Artificial Intelligence Through Neuroscience

*Fall 2024, Fall 2025**Fall 2024*

REVIEWING:

- Journal: *Scientific Reports*.
- Conference: Computational and Systems Neuroscience (COSYNE), Cognitive Computational Neuroscience (CCN).

ASSOCIATIONS:

- Society for Neuroscience, Singapore Chapter
- ALBA Network

SKILLS:

- **Languages:** Mandarin (native), English (fluent).
- **Programming Languages:** Python, R, PostgreSQL, Bash. Basics of: C/C++, Java.
- **Machine Learning & Data Analysis:** scikit-learn, Nilearn, Keras, AFNI.
- **Applications:** Git, $\text{\LaTeX}$.
